SUBJECT: ADMIX COMPARISON

We have been asked on a number of occasions how our crystalline admix compares to our competitors. After doing a review of our competitors safety data sheets and comparing it to our crystalline admix we can safely say that all the crystalline admixes that we reviewed all appeared to have the same basic chemistry. As near as we can tell the only thing that varies between all the crystalline admixes is the amount of filler that is used. In our case we don't use much filler. The filler is not what is important.

Based upon our research Alchemco's crystalline admix could be substituted for any other crystalline admix in the market place and still achieve the desired result. On a per cubic yard basis Alchemco's crystalline admix will perform equal to our competitors crystalline admix.

Any questions should be directed to the Technical Department or one of the members of the Technical Team.
